## SKILLS

---

**Languages:** HTML5, CSS3, JavaScript, SQL, Python

**Technologies/Frameworks:** React, Node.js, Express, ES6, PostgreSQL, Gatsby, jQuery, TailwindCSS

**Developer Tools:** Git/Github, NPM, RESTful APIs, Docker, Jest, Figma, Google Cloud Platform

## EXPERIENCE

---

### Front End Developer

May 2022 - May 2022

*MY Voice Canada - Mississauga, ON*

- Developed landing page for recruitment platform using **React**, **Tailwind CSS**, **NPM** packages, and **Nodejs**
- Created forms for donations and role applications, sending data to organization's database by integrating third party **API** Bloomerang, eliminating page redirects and resulting in increased user efficiency by 80%
- Improved site performance through optimizing of image size and rendering of placeholders using Gatsby's Static Image plugin, resulting in page load speeds of 0.8 seconds and a Cumulative Layout Shift (CLS) of <0.008

### Website Application Developer

March 2022 - April 2022

*Startup Peel Community - Brampton, ON*

- Collaborated with team of 3 developers to build a 6+ page website using **Gatsby** from concept through deployment, delivering a front-end solution for community-based organization within 4 weeks
- Created CSS themes using **Material UI** and built reusable, functional React components to standardize overall layout and visuals, resulting in 75% increased workflow efficiency

### Front End Developer

March 2022 - March 2022

*Lionstooth Energy - Remote*

- Leveraged **React** to implement website updates using code best practices in future maintainability and organization, improving **SEO** and **mobile responsiveness**, and resulting in faster load speeds by 10%
- Analyzed competing sites to identify trends in comparable industries, utilizing **Figma** to create mock ups of design improvements

### Software Engineer Intern

Feb. 2022 - March 2022

*Rūh - Toronto, ON*

- Helped architect technical and visual design of mental wellness mobile app with **React Native**
- Implemented **micro-interactions** using **Animatable** library, enhancing user experience during screen transitions, and decreasing likelihood of page abandonment during data retrieval load times of >3 seconds
- Collaborated with senior developers during **agile sessions**, and using tools such as **Docker**, and **Git/Github**

## PROJECTS

---

### Yo-Low Trips

- Full stack flight deals tracker designed to search, filter and favourite discounted airline tickets based on entered initial origin location.
- Created with **React**, **Material UI**, **Node.js**, **React Router**, **PostgreSQL**, and an airline **API**.

### Interview Scheduler

- Developed component based UI able to book, delete, and edit appointments via interview data API endpoint and updates number of spots remaining.
- Created with **HTML**, **CSS**, **React**, **SQL**, **Express**.

## EDUCATION

---

### University of Toronto, Bachelor of Science

*Mississauga, ON*

- Activities: UofTHacks IX, UofT Web Development Club Mentored Project Initiative

### Lighthouse Labs, Full Stack Web Development Diploma

*Toronto, ON*

- Demonstrated ability to plan, wireframe, and produce working MVP for final project with team members, successfully presenting app demo and pitch for an audience of 500+ members.
